

Consent Page

This study is conducted by Sinan Alper (from Yasar University), Onurcan Yilmaz (from Kadir Has University), and Fatih Bayrak (from Baskent University). The aim of the study is to collect data about how you infer certain beliefs and attitudes from faces. Participation in the study must be on a voluntary basis. No personal identification information is required in the questionnaire. Your answers will be kept strictly confidential and evaluated only by the researchers; the obtained data will be used for scientific purposes. The questionnaire does not contain questions that may cause discomfort in the participants. However, during participation, for any reason, if you feel uncomfortable, you are free to quit at any time.

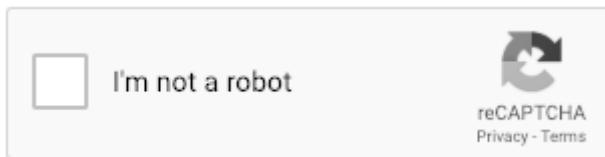

We would like to thank you in advance for your participation in this study. For further information about the study, you can contact Sinan Alper (sinan.alper@yasar.edu.tr).

By clicking "I agree" below you are indicating that you have read and understood this consent form and agree to participate in this research.

Captcha

Please verify that you are human by clicking box below.

Description

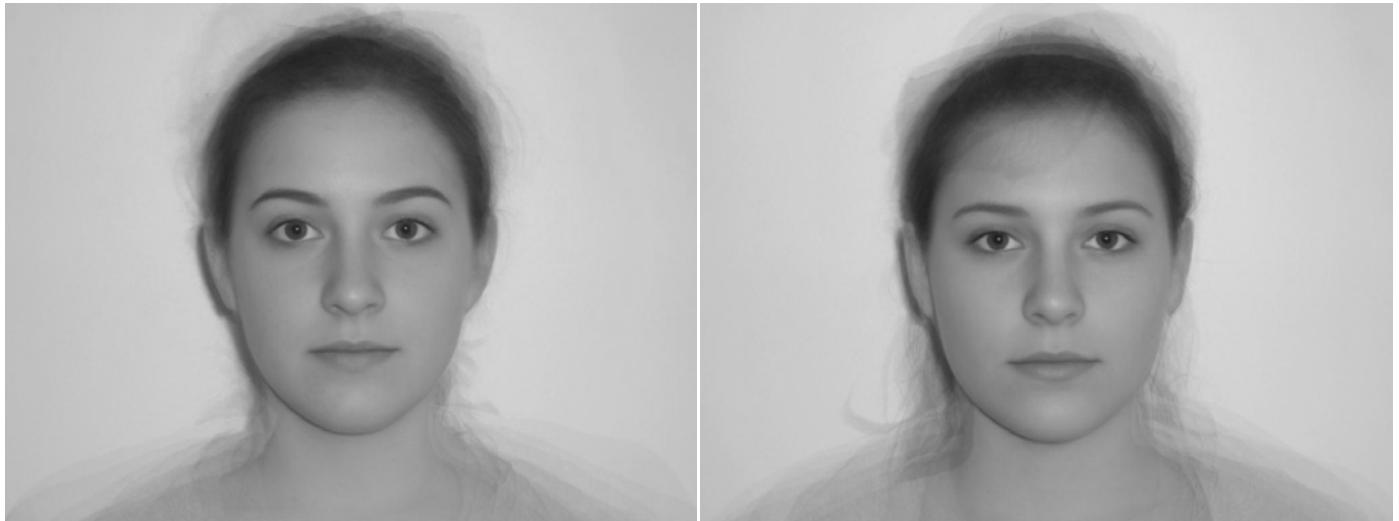

In the next step, you will see a series of photographs of faces. Please examine each face very carefully.

By only looking at the faces of these individuals, you will be asked to guess their personality.

AFF_LH

Person 1

Person 2

Agreeableness is "the tendency to agree and go along with others rather than to assert one's own opinions and choices".

Which person do you think is relatively **more agreeable**? Please try to guess by looking at their faces.
